NOTICE TO CONTRIBUTORS:

The Publishers wish to call your attention to the instructions for preparing manuscripts for Behavior Therapy. Format and style of manuscript should conform to the conventions specified in the "Publication Manual" of the American Psychological Association (1200 Seventeenth Street N.W., Washington, D. C. 20036; 1967 Revision, $1.50), with the exceptions listed below. Please note that it is the responsibility of the author that manuscripts for *Behavior Therapy* conform to the requirements of this journal.

INFORMATION FOR AUTHORS

Behavior Therapy is an interdisciplinary journal primarily for publication of the results of original research of an experimental or clinical nature which contributes to the theory or practice of behavior therapy or behavior modification in any setting. Occasionally, articles which critically review particular problems in the field will be published. Contributions that critically analyze and discuss important theoretical, social, or ethical issues raised by the theory or practice of behavior therapy are also welcomed. Brief descriptions of new apparatus or techniques (including novel applications of existing procedures), case studies of unusual significance, and systematic appraisal of special programs will also be acceptable from time to time. Finally, critical notices of new books and films of significance will be published.

Manuscripts may be submitted to the Editor: Cyril M. Franks, The Psychological Clinic, Rutgers University, New Brunswick, New Jersey 08903; or to the Associate Editor: John Paul Brady, Hospital of the University of Pennsylvania, 1141 Gates Building, Philadelphia, Pennsylvania 19104.

Form. Type at least double-spaced throughout (including tables, footnotes, references, and figure legends), with the original typescript on one side of a good grade of $8\frac{1}{2} \times 11$ inch white paper, with 1 inch margins on all sides. Mimeographed or duplicated manuscripts will be accepted *if they are indistinguishable from good typed copies.*

Submit two complete copies in order to expedite processing of the manuscripts. Each copy *must* include all figures and tables.

Number the pages consecutively. *Page 1* should contain the article title, author(s) name(s), and affiliation(s); at the bottom of the page type a short title not exceeding 35 characters and spaces, and the name and complete mailing address (including zip code) of the person to whom proofs should be sent. *Page 2* should contain a short abstract of not more than 150 to 200 words.

The name and full mailing address of the person to whom requests for reprints should be sent should be so indicated in the form of a footnote.

Headings. The organization of the paper must be clearly indicated by appropriate headings and subheadings.

Abbreviations and Symbols. Do not use final periods with units of measure that are abbreviated (cm, sec, kg, etc.) in text or in tables, except for "in." (inch). Underline letters that represent mathematical symbols; these will be set in italic type. Do not use the abbreviations, *S, E,* and *O* for subject, experimenter, and observer. Identify unusual symbols in pencil in the margin the first time they appear.

Equations. Number equations consecutively with the number placed in parentheses to the extreme right of the equation. Limit numbering to the equations that are in the main stream of the mathematical development. Refer to equations as Eq. 3 or simply (3), except at the beginning of a sentence when the word Equation should be spelled out. Punctuate equations to conform to their place in the syntax of the sentence.

Footnotes. Use only when absolutely necessary, in which case type the footnotes consecutively, double-spaced, on a separate sheet of paper in the order of their appearance in

the text. Use Arabic numbers 1, 2, etc. In the text, refer to footnotes by superscript 1, 2, etc.

Tables. Number tables consecutively with Arabic numerals in order of their appearance in the text. Type each table, double-spaced throughout, on a separate sheet of paper; avoid verticle rules. Supply a short descriptive title below the table number. Type table footnotes, lettered *a, b,* etc., at the end of the table. For further information, see the "Publication Manual," pages 33–34.

Illustrations. All illustrations are considered as figures, and *must be supplied in finished form,* ready for reproduction. Pages 37–39 of the "Publication Manual" describe concisely the proper preparation of line drawings and of photographs. Plan figures to fit the proportion of the printed page (allowing for the legend under the figure), and take care that lettering on the original is large enough to be legible after a reduction of 50–60%.

Number the figures with Arabic numerals 1, 2, etc., in order of mention in the text. Supply descriptive legends for all figures. Type these, double-spaced throughout, consecutively on a separate sheet of paper.

References. Cite references in the text by surname of the author, followed by year of publication:

Amarel, Cheek, & Stierhem (1966)	*first mention in text*
Amarel *et al.* (1966)	*second mention in text*

In citing more than one publication by the same author or authors in the same year, add suffixes a, b, c, etc., after the year, as (Smith, 1962a), and repeat the letter identification at the end of the reference in the bibliography.

Under the heading REFERENCES, arrange the literature citations in the text in alphabetical order according to the surname of the first author. Do not abbreviate journal names; write them out in full according to the form followed by *Psychological Abstracts,* Volume 42. Further information on literature citations may be found on pages 39–47 of the "Publication Manual."

The following examples show style of capitalization and punctuation for journal articles, books, and edited books:

HAWKINS, R. P., PETERSON, R. F., SCHWEID, E., & BIJOU, S. W. Behavior therapy in the home: amelioration of problem parent-child relations with the parent in a therapeutic role. *Journal of Experimental Child Psychology,* 1966, **4,** 99–107.

KRASNER, L., & ULLMANN, L. P. *Research in behavior modification.* New York: Holt, Rinehart, & Winston, 1965.

CAUTELA, J. R., & WISOCKI, P. A. The use of male and female therapists in the treatment of homosexual behavior. In R. D. Rubin & C. M. Franks (Eds.), *Advances in behavior therapy.* New York: Academic Press, 1968. Pp. 165–174.

Use underline only for journal names and book titles.

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. 50 reprints will be supplied free of charge. Additional reprints may be ordered on the form accompanying galley proof.
